

**Please note:** Specific instructions for enabling 2FA are subject to change without notice. Please check with each website or app for the most up-to-date information on this feature.

### Enhanced Security For Our Mobile App

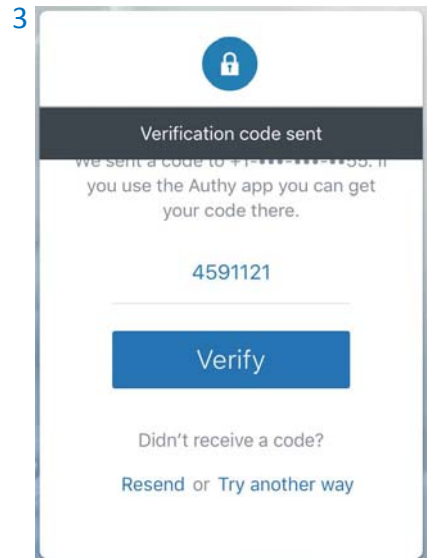

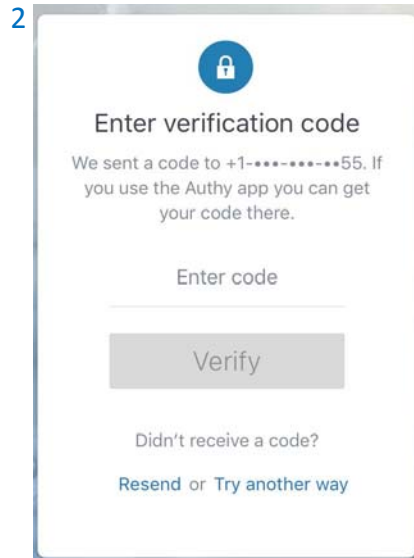

On **Wednesday, September 5th**, we are upgrading security. In addition to your password, we will ask you to authorize your device. This security enhancement is called Two Factor Authentication (2FA). The first time you use our mobile app after the upgrade, you will be asked to enroll by providing a telephone number where we can text or voice message you when we need to verify the device you are using for online banking.

### Enhanced Security for High Risk Transactions

We've defined certain transactions as high risk where we will require you to enter your password such as resetting your 2FA.

\* Authy App must be downloaded if Authenticator app is selected.

**Important for Mobile Device Users:** Your password is not the same as your passcode that you may use to unlock your device. Your password is what you use to log-in to Online Banking.
